# DS TECH CO.,Ltd

## Information

DS tech Co., Ltd. develops and supplies products that can take care of skin, such as beauty medical devices and microchip cosmetics.

Our technology, DMS is a cosmetic and derma cosmetics that help skin intensive care and absorption of active ingredients by microchips containing hyaluronic acid and active ingredients, which are moisturizing substances in the skin, to stimulate the skin.

We are a B2B company with DMS technology.

Microchip cosmetics will create a new paradigm in cosmetics with a new formulation based on a transdermal drug delivery system.
