# S.THEPHARM Co., Ltd.

## Information

S.THEPHARM is a Global Bio-Beauty company that was established in 2016. Our core values are QT; Quality, and Trust. We produce bio-beauty products that seek safety and efficiency to provide trustworthy products to our customers. Our manufacturing facilities are certified by KGMP(Korea Good Manufacturing Practices). We manufacture medical devices and cosmetics, including HA dermal fillers and cosmeceuticals. Our goal is to provide a total one-stop solution in the field of cosmetic surgery, from medical devices and cosmetics to pharmaceuticals. We continue to grow in the global market to pursue product safety and efficiency to keep our original mind.

### Products:

#### 1. QTFILL PLUS

QTFILL PLUS is the HA filler with Lidocaine approved by CE. It is divided into 4 models; AQ, Fine, Deep, Sub-Q, depending on viscoelasticity. Our proprietary technology patented in Korea, UHD(Ultra High Density), has been utilized to realize high viscoelasticity and excellent safety at 80% BDDE compared to other companies. In addition, QTFILL PLUS ensures excellent safety with the 14-day purification process that minimizes residual BDDE and endotoxin.

#### 2. QTCell

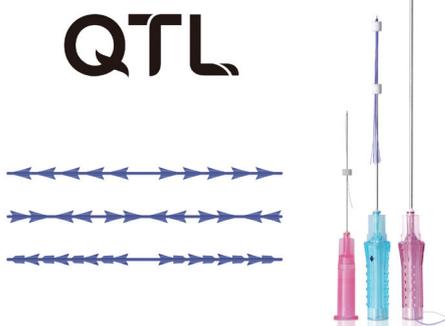

QTCell has 5 differentiated cosmetic products; Origin 100, Skin Booster, Black Label, SS Serum, and Daily Repair Cream. The main ingredient used to produce QTCell line of cosmetics is Human Dermal Fibroblast Spheroid Conditioned Media, an ingredient of our technology registered in ICID. This ingredient contains various growth factors that help regenerate the skin from the root, such as FGF, VEGF, procollagen, etc. Origin 100, Skin Booster, and Black Label are for clinics or beauty salons, and Serum and Cream are home-use.

#### 3. QTL

QTL is a lifting thread used to lift sagging skin, remove wrinkles, and smooth the entire facial contour. It has strong and uniformed 180-degree bidirectional cogs manufactured by the molding method.

## Items of Exhibition

HA Fillers, Cosmetics, Threads
